DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a cleaning substrate, classified in class 428, subclass 156.
- II. Claims 7-10, drawn to a method for cleaning a mold, classified in class 264, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using such as one where the substrate is used to form a void in a molded plastic article or can be used as a substrate in forming an encapsulated article, wherein the compound injected is a molding compound instead of a cleaning compound; the process as claimed can be practiced with another materially different product such as one made of release film comprising plastic or metallic foil materials.

Art Unit: 1732

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
